

Maths

The summer term of Maths will consist of applying the concepts we have learnt throughout the year so far. Our work will consist of a range of problem solving activities and investigations where the children will have to make conjectures, make generalisations and spot patterns.

Inquiry & Art

Our topic for the summer is 'The Ancient Greeks'. The children will be discovering the answers to many things about the Greeks such as: Who were the Ancient Greeks? What is an empire? What did they wear? What did they eat? And how different was Ancient Greece to modern day Britain?

English

This term, we will be using Science and Inquiry as our stimulus for our writing. Our focus text types will be: discursive, explanation, instructions, poetry and recounts. The children will really take matters into their own hands, deciding upon suitable success criteria and skills to include in their writing.

Summer 2018

Redwood Class

Year 5/6

PE

With Miss Forster, we will be playing Rounders and Cricket. We will also have a session with ProCoach each week.

Science

The children will be studying two biology topics for the final term of the year: 'The art of being a human' and 'The art of living'. The children will be creating their own investigations and experiments to deepen their 'working scientifically' skills.

PSHE

The themes this term are 'Relationships' and 'Changing me'.

Spanish

The children are thrilled to say, 'Hola!', to Ms Vives for our weekly Spanish session.

Hola!
