

We have really enjoyed playing collaboratively and learning some new games this half term including 'the human hamster wheel race', 'rainbow tag', 'fox and rabbits', 'animal partners', 'the tent pole challenge' and 'beetle tag'.

We learnt about bird migration and played a giant board game to help us understand some of the challenges migrating birds encounter. We also made some paper hanging birds

We used cloud spotters to identify different cloud formations. We learnt the names of some different types of clouds and we are planning to make a weather monitoring station
